TABLE OF CONTENTS, VOLUME XIII.

EDITORIAL.

APRIL.—To OUR READERS.—The REVIEW enters into its teens—our thanks to contributors—the journal is one of the necessities of the profession—good things said of her—editorial modesty overcome—the profession is worthy of our best efforts. **UNITED STATES VETERINARY MEDICAL ASSOCIATION.**—Relations between it and the REVIEW—the last meeting in Boston—a good attendance—New York's neglect—revising the by-laws again—reports of committees—let all colleges publish the names of their graduates—papers read—tuberculosis—mediate contagion—recording clinical observations. **SPELTER OR SPELTERINE.**—A new remedy—it is only a preparation of zinc—our success in its use for chronic scratches. **CERTAIN CURE FOR SPRINGHALT.**—We may recommend the trial of some drugs but not all—booming quackery is not our work—if a new therapeutic is worthy, let it be known. **PEDDLERS OF VETERINARY SCIENCE.**—The credulity of people—especially in veterinary matters—the imposter in human medicine—now in veterinary—his general appearance—mode of acting—look out for him—the remedy—the duty of the veterinary societies—the moment his trade won't pay he will stop.

MAY.—**UNITED STATES VETERINARY MEDICAL ASSOCIATION.**—Our relations—objects of each—creating and sustaining a truly Americanized veterinary profession—the progress of American veterinary literature—the works and the efforts of the REVIEW—our hospitality—gathering of good material at the semi-annual meeting. **THE MASSACHUSETTS VETERINARY MEDICAL ASSOCIATION.**—Etiology of tuberculosis by Koch, from the transactions of the Massachusetts Veterinary Medical Association—our publication of this valuable paper—also of the comptes rendus from Dr. Hoskins—also of other papers. **POLITICAL GUILLOTINE ON VETERINARIANS.**—One more convincing evidence of the progress of veterinary science in the United States—the veterinarian has had all he could wish—now the official guillotine works on him—his sudden collapse from official position to sad realization of political unimportance—it is not surprising to us—but why apply it to scientific specialists—Dr. Billings' resignation the result of political influence. **SACRIFICED TO PROFESSIONAL DUTY.**—Terribly sad news relating to Dr. P. Paquin—he is reported suffering with glanders—our hopes that we soon will have to report this as an error of diagnosis—our best wishes for his recovery. **COMPLAINTS.**—The REVIEW does not come regularly—who is at fault—a means to correct the evil—let us try it.

JUNE.—**DR. PAUL PAQUIN** "ALL RIGHT," BUT MUST NOT DO SO AGAIN.—Our first report fortunately contradicted—the good news received upon authority of the *Breeders' Gazette*—our pleasure and congratulations at his escape from a fearful

68538

death—the profession can't afford to lose such a good worker. **FIFTH INTERNATIONAL VETERINARY CONGRESS.** The time is approaching—our repeated calls to American veterinarians—will they answer them?—the request of President Chauveux and of Director Nocard—the Congress promises to be most interesting—the date fixed—the programme published. **INOCULATION AND PLEURO-PNEUMONIA**—Our knowledge of the work done by the Bureau of Animal Industry—how the work is progressing?—a positive answer difficult—change of officers—prospects doubtful—what will the result be?—shall we be obliged to have recourse to inoculation?—is it advantageous?—the results obtained in Australia—the letter of the Chief Inspector of Stock. **HOG CHOLERA.**—A collection of all that has been done in relation to it, and of all the investigations of Dr. Salmon, presented in concise book-form—advantages of such a book—principal conclusion of the author. **VETERINARY LEGISLATION.**—The laws of California and of New Jersey.

JULY.—**PNEUMO-ENTERITIS** one of the special forms of swine scourges—it prevails in Europe—existed in England—has been observed in France—Klein, Cornil and Chantemesse the European investigators—search for a vaccine—failures—F. S. Billings' (of Nebraska) claims—how successful has he been?—An experiment *à la Pouilly-le-Fort* wanted—the last word on the nature of the disease not yet told—Prof. Galtier's remarks—his investigations of an outbreak in Southern France—his report—his conclusions—sheep subject to a disease similar to pneumo-enteritis in swine—the same disease is inoculable to all farm animals—a third series of experiments shows that it can produce various affections—in cows—in calves—in horses—serious statements advanced by the learned professor—they need confirmation, if they can be confirmed—has the correct and complete biology of the microbe been studied?—has the Professor been too hasty?

AUGUST.—**ÆTIOLOGY OF TUBERCULOSIS.**—Conclusion of this most excellent article—its translation due to the initiative of the Massachusetts State Veterinary Association—Dr. Koch's letter of authorization—the enterprising spirit of the **REVIEW**—expense no obstacle to its publication—yet it is not so complete as might be wished—enough shown to demonstrate that bacillus is the all important factor—without it no tuberculosis—with it nothing else—the value of the paper to all, pathologists, biologists, students—minute points of detection described—the pseudo-tubercles cannot deceive any longer. **VETERINARY APPOINTMENT.**—Progress made in the past few years—position of the veterinarian to-day—that of a few years ago—official appointments—creation of new veterinary positions—sanitary science makes it all—Dr. Knowles' recent appointment—his prospects—our hopes—need for an official veterinary directory—we are ready for it. **IMPORTANT NOTICE.** If the **REVIEW** does not come regularly we are not always to blame—help us in the proper delivery. **UNITED STATES VETERINARY MEDICAL ASSOCIATION**—**IOWA STATE VETERINARY MEDICAL ASSOCIATION**—Annual meeting of both.

SEPTEMBER.—**RE-OPENING OF OUR VETERINARY SCHOOLS.**—After vacation the good work begins again—veterinary practitioner of twenty-five years ago—veterinary surgeon of to-day—work of veterinary colleges—their duties in the past—their obligations in the future—the need of strictly *veterinary* education—the motto "constant improvement," **IOWA STATE VETERINARY ASSOCIATION.**—The

second annual meeting—prospects of a good gathering—papers of interest to be presented. A NEW VETERINARY SCHOOL.—The Maryland University adds a veterinary department—the veterinarians connected with it. DEATH OF DR. E. F. THAYER. ARMY VETERINARIANS.—The efforts of the REVIEW in their behalf—the penal recompense for our labors—another letter on the need of reform—The United States Veterinary Medical Association and its committee—is the chairman so guilty after all—the duties that are imposed upon the Association and on veterinarians—bill to be proposed—its discussion in the REVIEW asked for.

OCTOBER.—OUR EMBARRASMENTS.—Dilemma hard to solve—our summer vacation—large amount of material in hand—crowd of interesting subjects—we must postpone their consideration, or our readers suffer—time is wanted. ARMY VETERINARY LEGISLATION.—We cannot, however, present ourselves before our friends without a word on that subject—Dr. Griffin's communication—the new bill offered—suggestions as to its passing Congress—cash may be necessary—let a fund be established and placed in the hands of the United States Veterinary Medical Association—we shall be pleased to hear responses on the subject and gladly open the subscription list. AMERICAN PUBLIC HEALTH ASSOCIATION.—The meeting takes place this month.

NOVEMBER.—SEPTEMBER'S IMPORTANT VETERINARY EVENTS.—5TH INTERNATIONAL VETERINARY CONGRESS.—The bureau and officers elected—regulation of the work—subjects discussed—tuberculosis—report of Mr. Arloing—seven important resolutions adopted—pleuro pneumonia—Messrs. Degive's and Butel's excellent reports—resolutions unanimously passed—other questions also treated, discussed and adopted—the inauguration of the Bouley statute at Alfort—the grand display of love and respect to the great veterinarian, the author, the teacher, and the friend of all—banquet at the Eiffel tower. THE VETERINARY PROFESSION AT THE EXHIBITION.—The French schools well represented—rivalry of Alfort, Lyons and Toulouse in their special shows—not enough botany, but too much horse-shoeing—the private exhibitions—our duties in 1892—our remembrance of 1876 and of Dr. Gadsden's handsome show cases—collection of the French veterinary journals—each school has its special organ, UNITED STATES VETERINARY MEDICAL ASSOCIATION.—Though less brilliant, not the less useful—our absence prevents our personal remarks—review and criticism by N. N. S.

DECEMBER.—PREVENTATIVE INOCULATION OF CONTAGIOUS PLEURO-PNEUMONIA.—Director Nocard's notice in the *Recueil*—Dr. Germont's and Mr. Loir's teachings—Dr. L. McLean's record—inoculation not a new thing in Australia—difficulties in the way of securing fresh virus—how to overcome them—demonstrations of the French scientists—Pasteur's methods of obtaining good material for inoculation—formation of a national (?) laboratory to provide it—a good thing for pathologists in this country—why do they not prepare fresh vaccine virus for this disease—and for others known to be amenable to vaccination? ARMY VETERINARIANS.—Is the subject at last assuming good shape?—are there prospects of something being accomplished?—action of the various associations—of committees—of commissions—personal efforts—Dr. Griffin at work—our suggestion of a sinking fund—its approval by many—subscriptions coming in—more looked

for—list started. To our SUBSCRIBERS.—Letters received—causes giving rise to them—the manner in which they are written—the symptoms of the trouble—the diagnosis and prognosis relating to it—remedy—pay your subscription promptly, or —— no REVIEW.

JANUARY.—ARMY VETERINARIANS.—ARMY LEGISLATION.—Confidence in the success of the present effort—Congress will certainly grant our request—the profession awake—subscriptions increasing—objections from some—danger of too many bills—separate efforts, laudable as they may be, should be stopped—let the motto “all for one” be ours—let the United States Veterinary Medical Association go ahead—Chairman of the Committee, Dr. Huidekoper, will leave no stone unturned to succeed. **HEALTH VETERINARY OFFICERS.**—The next question of importance—State and City Boards of Health can no longer ignore veterinarians—few now are appointed, but more are bound to follow. **VETERINARIANS AS JUDGES AND INSPECTORS.**—The request for their appointment made by one of our best agricultural papers—it wants veterinarians appointed to horse shows as judges and inspectors—all those official appointments will have their drawbacks—official decapitation—Dr. J. F. Winchester one of the last victims—Massachusetts moves backward—these appointments will have to be made life positions. **PROFESSOR HUIDEKOPER AND THE VETERINARY DEPARTMENT OF THE UNIVERSITY OF PENNSYLVANIA.**—His resignation—he retires to private practice and assumes the editorship of the *Journal of Comparative Medicine and Veterinary Archives*.

FEBRUARY.—McGILL UNIVERSITY'S NEW FACULTY OF COMPARATIVE MEDICINE AND VETERINARY SCIENCE.—Montreal Veterinary College definitely absorbed by McGill University—will the profession gain by the change?—Prof. McEachran's grand efforts and grand professional results—our compliments and our regrets. **PAQUIN VACCINE LABORATORY.**—Our past references to the necessity for such institutions—efforts in that direction—the opening offered to veterinarians and biopathologists—the work of Drs. Faust and Salmon and Professor Law—claims of the new laboratory—hopes and wishes for its success—this depends on the material produced—vaccines have proved their value. **DIARRHOEAS AND SCOURS.**—Dr. G. A. Stockwell's article—a comparative pathologist is a veterinarian—the treatment recommended—pepsin as the basis—Parke, Davis & Co.'s preparations—reports of their uses—results obtained—more wanted.

MARCH.—VETERINARY JOURNALISM.—President W. L. Williams' paper read before the Illinois State Veterinary Medical Association—his suggestions and our thanks—papers that have lived—they are doing their best—the REVIEW among them—our object and our motto—one for all—review of our efforts—the offers we made several times—they are evidences of our enthusiasm—recommendations of Dr. Williams—assist—not pecuniarily—but by actions—by writings—our proposal to the Veterinary Societies of North America—its acceptance will mean better journals and permanent records to those who will stand by it. **ARMY VETERINARIANS.**—Dr. J. A. Waugh, V.S.—letter and remarks. **A NEW VETERINARY SOCIETY IN NEW YORK STATE. A NEW VETERINARY PAPER IN ITALY.**

ORIGINAL ARTICLES.

Genealogy of the Horse, and its Importance to the Human Race. A Paper read before the Deutscher Literarischer Club, Cincinnati, October 3rd, 1888. By J. C. Meyer, Sr.....	7
Keratitis Contagiosa in Cattle. By Frank S. Billings, Director of the Patho-Biological Laboratory of the State University of Nebraska.....	23
Parturient Apoplexy. By D. T. Hinebauch. Extracted from Bulletin of Experimental Station of Indiana.....	28
The Use of Narcotics in Painful Operations. By Prof. Dr. Esser. Translated by John Faust	30
Etiology of Tuberculosis. By Dr. Koch. Translated by Rev. F. Sause.	54, 104, 197
Recording Clinical Observations. By A. Liautard. A paper read before the United States Veterinary Medical Association.....	82
Mediate Contagion. By Dr. Gadsden. A letter read before the United States Veterinary Medical Association....	88
Are Quadrupeds subject to Hemorrhoidal Diseases? By J. Faust.....	130
General Lymphangitis. A Paper read before the California State Veterinary Medical Association, December 13, 1888. By J. P. Klench.....	214, 246
The Mania for Innovation in Therapeutics. By T. W. Turner.....	223
The Veterinary Surgeon in the United States Army. By Gerald E. Griffin.	258
Singular and Unaccountable Experiences in France, said to be in connection with Swine-Plague. By M. Galtier. Reported and criticised by F. S. Billings.	265
Can Glanders be Prevented by Inoculation? By Frank S. Billings.....	269
Ergotism. By H. A. Spencer. A Paper read before the California State Veterinary Medical Association.....	273
Glanders in Man and Beast. By P. Paquin.....	291
Transverse Development of the Fœtus of the Mare. Paper read before the Illinois State Veterinary Medical Association. By W. L. Williams.....	298
Modern Feeding of Pigs, and its Influence upon the Formation of the Skull and Dentition. By Olof Schwartzkopf.....	305
The Diarrhoeas or "Scours" of Nurslings: Colts, Calves and Lambs. By G. Archie Stockwell, member of New Sydenham Society (London).	314, 368, 408
Tuberculosis. By M. Arloing.....	344, 389, 448
United States Veterinary Medical Association. Twenty-five years' work reviewed. An address delivered at the 26th Annual Meeting of the Association, by ex-President R. S. Huidekoper.....	356, 399, 456
Review and Criticism of the Meeting of the United States Veterinary Medical Association. By N. N. S.....	364
Resolutions on Tuberculosis. Presented at the Twenty-sixth Meeting of the United States Veterinary Medical Association. By L. McLean.....	374
Glycerine in Veterinary Practice. By J. Coates.....	437
Veterinary Education in America. By Tait Butler.....	440
Report of Committee on Intelligence and Education. By W. J. Coates.....	444
How do Micro-Organisms cause Disease? Based upon an address by Lud-	

wig Brieger to the Sixty-second Versammlung Deutscher Naturforscher u Aertzte. By Wm. S. Gottheil.....	484
Complicated Case of Pneumonia and Glanders. A paper read before the Veterinary Society of the University of Pennsylvania. By H. A. Heisner.....	489
Bovine Tuberculosis. A paper read at a meeting of the New Jersey State Veterinary Society. By E. L. Loblein.....	492
The Control of Sex in Breeding. By J. P. Klench.....	496
Address read before the Illinois State Veterinary Medical Association. By W. L. Williams	534
Pleuro-Pneumonia. A Paper read before the Royal Scottish Veterinary Society. By Professor Walley.....	542
History of Contagious and Infectious Diseases; Ancient, Middle Age and Modern. A Paper read before the United States Veterinary Medical Association. By J. Faust.....	554

SURGICAL PATHOLOGY.

Peculiar Microbic Tuberculosis of Cattle. By Mr. Courmont.....	464
Contribution to the Pathology of Anthrax. By W. Rosenblath.....	464
On the Mode of Acting of the Bacteria of Anthrax in the Organism. By Mr. El. Metschnikoff.....	465
Etiology of Epizootic Hemoglobinuria of Cattle. By V. Babes.....	466
Notes on the Presence of the Rabid Virus in Nerves. By E. Roux.....	505
Contribution to the Theory of Suppuration. By A. Grawitz	506
Immunity of Rabbits against the Bacillus of Rouget of Swine. By E. Metschnikoff.....	507

PHYSIOLOGICAL PATHOLOGY.

On the Contagion of Ovine Variola. By M. Peuch.....	32
Microbism and Abscesses. By Mr. Verneuil.....	33

EXPERIMENTAL PATHOLOGY.

A Rapid Method of Diagnosis in Glanders. By I. Strauss.....	225
On the Duration of the Life of Pathogenic Microbes in Water. By Strauss and Dubarrey	422
Action of Rabid Virus Introduced either in the Subcutaneous, Cellular or in other tissues. By C. Helman.....	423
Study up on Immunity in Relation to Anthrax. By Professor Perroncito...	424

BIBLIOGRAPHY.

Roaring in Horses—Laryngismus Paralyticus. By George Fleming.....	89
Physiology of the Domestic Animals. By Robert Meade Smith.....	91
Nouveau Dictionnaire Pratique de Medecine, Chirurgie and Hygiene Veterinaires, begun by H. Bouley and continued by A. Sanson, L. Trasbot, Ed. Nocard.—Vol. XVI. and XVII.....	424
"Animal Physiology." By Wesley Mills.....	425

Le Berceau de l'Enseignement Veterinaire—Creation et Evolution de l'Ecole Nationale Veterinaire de Lyon—1761-1889—(Birth Plan of Veterinary Education—Creation and Growth of the Lyons Veterinary School)—By Dr. S. Arloing.....	470
Trattato Teorico-Pratico di Materia Medica e Terapeutica Veterinaria, (Theoretical and Practical Treatise of Veterinary Materia Medica and Therapeutics). By Professor Lorenzo Brusasco.....	471
Veterinary Medicines; Their Action and Uses. By Finlay Dunn. Seventh Edition, Revised and Enlarged. Edinburgh: David Douglas, 1889.....	512

COLLEGE COMMENCEMENTS.
